ABOUT ME

I am a highly skilled and motivated software developer with expertise in web development. With a strong background in designing and developing user-friendly websites and applications, I consistently deliver high-quality results. Passionate about learning new technologies and staying up-to-date with industry trends, I actively seek opportunities to collaborate with teams and create innovative solutions. My dedication to excellence and commitment to leveraging my skills make me a valuable asset in delivering impactful software solutions.

PROJECTS

University Website

- Designed the university website design using HTML, CSS and JavaScript. It includes the structure for the header, navigation, about us content, and footer sections, as well as some JavaScript for toggling the menu.
- The website appears to be for Chitkara University in North India and contains information about the university, its programs, and its campus recruiters, includes links to external files such as "style.css" and "fontawesome" for styling and icons, as well as images for the logo and about section.
- The JavaScript functions "showMenu" and "hideMenu" are used to toggle the visibility of the navigation menu on smaller screens.

Restaurant Website

- Designed and developed a food website using HTML, CSS, and JavaScript delivering an user friendly and interactive experience.
- JavaScript adds interactivity to the website by enabling the navigation menu to open and close when the menu icon is clicked. It also ensures that the menu closes when the user scrolls the page, providing a seamless user experience.

Spotify Clone

- Build the Spotify Clone using ReactJs and styled components using Spotify API and Context Api.
- Implemented the player controls play/pause, playlists as well as current track. Also added the feature of changing the track in the website as well as in the account.
